

Scavenger Hunt for Educators

From Elementary School Homepage

1. Use *frogs* for your **Keyword Search**. Open the **Read Aloud** feature and launch *Animal Bytes: Frog and Toad*. Highlight the first two sentences to hear the differences between the frog and toad. Which of the two amphibians has shorter legs? Name the 2 optional voices the user can choose for Read Aloud.
2. Use the Theme Search feature to search for food pyramid. By using Narrow Your Subject, locate Learning Games within Science. Just by reviewing the evaluator detail, which website has interactive games such as food pyramid match game to help students learn about nutrition? Save all the Learning Games websites except the last one. How many websites are in your Saved Search?
3. Complete an Image Search on butterflies. Using the Grade Leap feature, are the same or different images displayed for High School?
4. Locate *BBC Fossil Fun* (Interactive Games) using keyword *fossil*, and launch the site. Click **Open** under the graphic. Click the first question mark and continue to click **Next** to see fossilization in action. Wasn't that a fun way to learn about fossilization?

Scavenger Hunt for Educators

From Middle School Homepage

1. Click on Teacher Tools in the Features box. Click Technology in the Classroom and Internet Safety. How many Lesson Plans are available on Internet Safety?
2. Click on the Standards button at the top right of the page and do a Keyword Search on gravity. How many standards relate to gravity at the middle school level? Focusing on the first standard listed, and continuing with gravity as the Web Resource (you may need to type gravity as the User Defined Keyword), how many Learning Exercises search results are available? What is the URL for Science Monster: Gravity and Inertia?
3. Create a Famous Person Search for Marie Curie. Click the timeline icon to display a timeline of events during her lifetime. Name a war that took place during her lifetime. List an invention or discovery. Expand the famous person section and list the year that a world renowned artist passed away.
4. From the English Learners channel, select Multicultural Pavilion. Under Diversity in the Classroom, list 4 Asian Heritages. How do you locate websites in Spanish for resources in Hispanic Heritage? Using the legend, what language is represented by TL?
5. Enter a keyword of your choice and Save your search. Create a bibliography for the first site in your Saved Search using the Landmarks Citation Machine found in References and Schoolwork Essentials section in the Features box. What is the other bibliography tool found in The English Language section? What section in References can you find Copyright-Free and Friendly Clip Art?

Scavenger Hunt for Educators

From High School Homepage

1. Do a Keyword Search on Industrial Revolution. How many search results were generated? How many sites contain primary source documents? Click the Standards button above the first search result. Select the first standard that supports Industrial Revolution. Based on the student expectation for that standard, which Web Resource would you select to generate relevant search results?
2. Complete a Subject Search by clicking on Biology under the Science subject area. Drill down to Animals and then Pets. Click on the gray Dictionary button next to the web result Guinea Pig Compendium in the Guinea Pigs Behavior area. What is the definition of the word survival according to Ultralingua? What is the Spanish translation for survival?
3. Do a Keyword Search for forensic science. What is the Readability Level of the first Audio resource? What is the Grade Level Equivalency for that Readability Level? Launch the Audio resource ABC: Great Moments in Science: Autopsy and write the literal meaning of autopsy.
4. Using the Current Events section, find the name of the regional newspaper serving Fort Lauderdale and South Florida? Who is the publisher of CareerJournal.com, a website located in Vocational News?
5. Use the Advanced Search feature to locate resources from government organizations such as .gov sites, after you complete a Keyword Search for robotics. How many websites are displayed?
6. List one way you plan to use netTrekker d.i. in your classroom.
